CS 412 In-Class Kaggle Competition

Severity Score Prediction for Bug Descriptions

Overview Data Discussion Leaderboard Rules Team Submissions

Overview

The project aims to increase your knowledge about machine learning and get hands-on practical experience. The course project will allow you to work on a real machine-learning problem. You will work in groups of 4-5 people already formed and entered.

Precision Score

Table of Contents

Overview

Description

Evaluation

Description

The task is to assign a severity score to a given bug description. Each bug report includes a description and its bug type. Bug severity should be scored from 1 to 6, from Enhancement (1), Minor (2), Normal (3), Major (4), Blocker (5), and Critical (6), in order.

Below is a snippet of the data.

bug_id	summary	severity
365569	Remove workaround from bug 297227	normal
365578	Print Preview crashes on any URL in gtk2 builds	critical
365582	Lines are not showing in table	major

Evaluation

Table of Contents

Overview

Description

Evaluation

The models will be evaluated based on **Macro Precision**.

Submission File

For each "bug_id" in the test set, you must predict the severity score. The file should contain a header and have the following format:

bug_id	severity
365569	normal
365578	critical
365582	major

Note: The shape of the submission file must be compatible, meaning having the correct number of rows and columns, otherwise the Kaggle will not allow any submissions.

Severity Score Prediction for Bug Descriptions

[Overview](#) [Data](#) [Discussion](#) [Leaderboard](#) [Rules](#) [Team](#) [Submissions](#)

Dataset Description

For this challenge, three files have been provided:

1. bugs-train.csv:

- This file contains the training data that you will use to train your models.
- **Columns:**
 - `bug_id` : A unique identifier for each bug
 - `summary` : The bug's description
 - `severity` : The severity class for each bug

2. bugs-test.csv:

- This file contains the test data on which you will make predictions using your trained models.
- It has the same columns as the training data except for the severity column (label).

3. sample_submission:

- This is an example file provided to illustrate the format required for submissions to Kaggle.

1. Group Size:

- All groups should be formed according to the Excel file specifications, with 5 (or 4) members each.

2. No Cross-Group Sharing:

- Sharing results between groups is prohibited.

3. Daily Submission Limit:

- The maximum number of submissions per day is set to 3 for all group members combined.
- If one member makes a submission, the remaining submissions for the other members will be reduced to 2.

4. Model Experimentation:

- Trying different models and approaches is allowed.
